Subject: Letter of Recommendation for MAHER KHEDER

To the Admissions Committee,

It is my professional pleasure to recommend Mr. Maher Kheder, who collaborated with DastN GmbH as a Laravel Developer from July 2025 to January 2026.

During his engagement with our company, Mr. Kheder demonstrated strong technical maturity and structured engineering reasoning beyond routine software development tasks. He was responsible for designing and implementing scalable web-based systems, applying object-oriented principles, database optimization techniques, and modular architecture practices aligned with enterprise standards.

What distinguished Mr. Kheder was his analytical approach to system design and his ability to understand distributed environments, data integrity mechanisms, performance optimization strategies, and secure configuration practices. He consistently evaluated architectural trade-offs and proposed technically sound solutions reflecting long-term system perspective.

He worked within structured development workflows and adhered strictly to European data protection regulations, including GDPR-aligned standards, demonstrating reliability, precision, and professional responsibility in handling sensitive information and complex technical environments.

Based on his performance and professional conduct, I am confident that Mr. Kheder possesses the intellectual discipline, technical foundation, and analytical capability required for advanced graduate study in complex systems, automation, and information technologies.

I recommend him without reservation for admission to the Master's program in Advanced Systems in Automation and Information Technologies (SAATI).

Please feel free to contact me should further information be required.

Sincerely,

Adam Sulaiman

Chief Executive Officer of DastN GmbH
